

Flight Tracker Consortium Meeting

June 4, 2025

www.edgeforscholars.org

https://redcap.link/flight_tracker

Meeting Agenda

Current Version:
v6.21.1

What's New?

Release v6.21.1: Many Bug Fixes
Increasing Minimum REDCap Version in July
Transcripts for Flight Tracker Help

Deep Dive: Finding “Special” Data Points

What's Next?

“Find a Collaborator” Major Upgrade
Mentee-Mentor Agreements: Custom Questions
“Leaky Pipeline” Detection Survey

What's New?

Flight Tracker v6.21.1

- **To be released any day now [in review]**
- Automated ORCID pulls are turned off; now ORCID Wrangler is used
- On Summary form, add a field to count all grants
- Bug fixes:
 - Error with “null” value with publications
 - IES & NSF grants are included in grant analyses
 - Sometimes, pubs dashboard had bad Unconfirmed count
 - Stylized Grant Tables have corresponding headers
 - Stray text in Scholar Portal

Minimum REDCap Version

- In **July**, Flight Tracker's minimum REDCap version is increasing from **v13.1.0** to **v14.0.2**
 - This will affect 10 projects on REDCap **v13.x.x**
 - **Impact:** After July, you will not be able to upgrade Flight Tracker unless your system upgrades REDCap first!
- Latest REDCap versions: **v15.0.26** [LTS] and **v15.4.2** [Standard]
- If you are affected, contact your REDCap administrator to request a REDCap upgrade. By upgrading, your institution will receive new features, bug fixes, and security patches.

Transcripts for Flight Tracker Help

- <https://edgeforscholars.vumc.org/flight-tracker-tutorials/>
- Green items exist;
black items are coming
- **Coming in a few days:
NIH Training Tables**
- We have plans to add online
videos to each transcript

The Educational Module for Flight Tracker

These pages are under development. We will first provide a written transcript
and then aim to add a video introduction to the topic.

- **Steps to Get Started**
- History & Overview
- REDCap Instruments
- REDCap Surveys
- Wrangling Data
- Scholar Data
- Publication Graphics
- Grant Data
- NIH Training Tables
- Cohorts
- REDCap Reports
- **Scholar Portal Administration**
- **Using Your Flight Tracker Profile on the Scholar Portal**
- Tracking Resources & Effectiveness
- Mentee-Mentor Agreements
- The Kaplan-Meier Curve
- Where Can I Find What Data Points?
- Project Dashboards
- [Data Aggregation – to come]

Deep Dive

Finding “Special” Data Points

Overview

For “special numbers:”

- Summary form in REDCap
- Scholar Profile
- Dashboards
- Grants & Pubs in REDCap
- Corrections
- Your Feedback

Basic Question

What specific information does
Flight Tracker provide?

Where can it be found?

Summary Form

- Each scholar's Summary form has the most data points
 - The computer calculates this instrument each week
- Three parts:
 - Top: Demographics
 - Middle: Publication & grant metrics
 - Bottom: Deduplicated career-defining grant awards
- The middle part is our focus

Summary Form: Middle

- Dates:
 - Start of First Training Grant
 - End of Last Training Grant
 - First Any K Grant [any K-class grant]
 - Last Any K Grant
 - First External K Grant
 - Last External K Grant
 - First R01-Or-Equivalent Date/Type
 - First R01 Date

First Any K Date	2007-07-01 Today Y-M-D
First Any K Date Source	New Custom Grants (REDCap) ▼
First Any K Date Self-Reported?	Manually Entered ▼
Last Any K Date	2009-01-01 Today Y-M-D
Last Any K Date Source	COEUS (online database) ▼
Last Any K Date Self-Reported?	Computer-Generated ▼
First External K Date	2009-01-01 Today Y-M-D
First External K Date Source	COEUS (online database) ▼
First External K Date Self-Reported?	Computer-Generated ▼
Last External K Date	2009-01-01 Today Y-M-D
First External K Date Source	COEUS (online database) ▼
First External K Date Self-Reported?	Computer-Generated ▼
First R01-Or-Equivalent Date	2015-04-01 Today Y-M-D
First R01-or-Equivalent Type	R01 ▼

Summary Form: Middle

- Timespans in years:
 - First Any K to First R01/Equiv
[This represents the time on K-class funding]
 - First External K to First R01/Equiv
 - Last Any K to First R01/Equiv
[This represents time unfunded – needing bridge funds]
 - Last External K to First R01/Equiv

Timespan (years): First Any K to First R01	 7.751014736784465 View equation
Timespan (years): First External K to First R01	 6.245051803482162 View equation
Timespan (years): Last Any K to First R01	 6.245051803482162 View equation
Timespan (years): Last External K to First R01	 6.245051803482162 View equation

Summary Form: Middle

- The conversion categories are interested in three items:
 - Did you convert?
 - If so, what type of grant did you convert from?
 - Did you convert while on K or not while on K?

Ever Converted External K (First) to R01 or equivalent?	<input type="checkbox"/>	Converted External K to R01-or-Equivalent No
Ever Converted External K (Last) to R01 or equivalent?	<input type="checkbox"/>	Converted External K to R01-or-Equivalent no
Ever Converted First Any K to R01 or equivalent?	<input type="checkbox"/>	Converted Any K to R01-or-Equivalent not Wh
Ever Converted Any K (Last) to R01 or equivalent? (This contains the 'conversion status'.)	<input type="checkbox"/>	Converted Any K to R01-or-Equivalent not Wh

- Conversion categories:
 - Ever converted from first External K to R01/Equiv?
 - Ever converted from last External K to R01/Equiv?
 - Ever converted from first Any K to R01/Equiv?
 - Ever converted from last Any K to R01/Equiv?
[Traditional “conversion status” field]

Summary Form: Middle

- Activities in grants & publishing [Dates]:
 - First Grant Activity
 - Last Grant Activity
 - First Publication
 - Last Publication

First Grant Activity	 	2007-07-01		Today	Y-M-D
Last Grant Activity	 	2028-07-31		Today	Y-M-D
First Publication	 	2005-09-01		Today	Y-M-D
Last Publication	 	2025-05-01		Today	Y-M-D

Summary Form: Publishing

- H Index:
 - From iCite – only one needed
 - From Web of Science – if applicable
 - From Scopus – if applicable
- Odd bibliometrics, derived from iCite: [Formulas are in the field notes]
 - HI
 - HI,norm
 - HI,annual
 - G Index – most used

Publishing Metrics	
H Index calculated from iCite	<input type="text" value="37"/>
H Index calculated from Web of Science	<input type="text" value="30"/> <small>To enable, place user id and password in Application Configuration</small>
H Index from Scopus	<input type="text"/> <small>To enable, place API key in Application Configuration</small>
HI calculated from iCite	<input type="text" value="3.539"/> <small>hIndex / [average number of authors in contributing pubs]</small>
HI,norm calculated from iCite	<input type="text" value="14"/> <small>normalizes each H-Index input to [number of citations] / [number of co-authors]</small>
HI,annual calculated from iCite	<input type="text" value="0.700"/> <small>HI,norm / [number of years of publications]</small>
G Index calculated from iCite	<input type="text" value="60"/> <small>the largest integer such that the most-cited g articles received together at least g^2 citations</small>
Total Budget	<input type="text" value="12089551"/>

Summary Form: Totals

- Number of Career-Defining Grants [update in queue]
- Number of All Grants [soon to be added]
- Number of Publications [wrangled]

Pre-Calculated Values for Statistics	
Number of Grants	 <input type="text" value="10"/>
Number of Publications	 <input type="text" value="129"/>

Scholar Profile

- Many values in a profile reflect the Summary form
- The profile's unique values will be shared in these slides' lists
- Publications:
 - Number of First-Author Articles
 - Number of Last-Author Articles
 - Simply based on order of authorship
 - Confirmed Original Research Articles
 - Total Citations by Others

Julie Bastarache
Spoof This Scholar in the Scholar Portal for This Project Only
Spoofing or mimicking a scholar allows you to see what they might see or to troubleshoot issues as they arise.

Turn on a feature just for this record (16).
ERIC (Education Publications) (Off)
☒ On ☐ Off
[Save Settings](#)

First Name:	Julie	Primary Department:	Medicine/Allergy Pulmonary & Critical Care [104383] Allergy Pulmonary&Critical Care
Last Name:	Bastarache	Degrees:	MD
Email:	julie.bastarache@vumc.org	Institution(s):	Vanderbilt
REDCap:	Record 16	Converted?:	CONVERTED WHILE NOT ON K
Number of First-Author Articles:	18/129	Number of Last-Author Articles:	25/129
Confirmed Original Research Articles:	129		
Grants:	10	Citations by Others:	3,921

Scholar Profile

- Total dollars for all grants
[Note: Flight Tracker is not a financial application, and these values may be incorrect]
- Resources used [if tracked]
- Number of confirmed patents [if using Patent Wrangler]
- Average Relative Citation Ratio from iCite

Number of Confirmed Patents:	0	Number of First-Author Publications During Training:	16/123
Number of Publications During Training:	123		
Number of Last-Author Publications During Training:	25/123		
H Index calculated from Web of Science:	30	Average Relative Citation Ratio from iCite Scores:	3.079
H-Index, calculated from iCite figures from iCite (NIH):	37	HI, calculated from iCite figures (hIndex / [average number of authors in contributing pubs]):	3.539
HI,norm, calculated from iCite figures (normalizes each H-Index input to [number of citations] / [number of co-authors]):	14	HI,annual, calculated from iCite figures (HI,norm / [number of years of publications]):	0.700
G-Index, calculated from iCite figures (the largest integer such that the most-cited g articles received together at least g^2 citations):	60		

Dashboards

- Flight Tracker has numerous dashboards on a variety of topics
- The Dashboards menu has all the options, too many to list here
- **Categories:**
 - Overall
 - Grants
 - Grant Budgets
 - Grant Budgets by Year
 - Honors, Awards & Activities
 - Emails
 - Demographics
 - Dates
 - Resources
 - Mentee-Mentor Agreements
 - Publications:
 - By Year
 - By Category
 - By Journal
 - By Publication Type
 - By MeSH Terms
 - Miscellaneous Metrics

Dashboards: Pearls

Numbers or Figures	Dashboard Page
Number of Confirmed Publications	Publications by Category
Average & Median Citations by Others	Publications Misc. Metrics
Average & Median Relative Citation Ratio	Publications Misc. Metrics
Total Citations by Others	Publications Misc. Metrics
Total Number of First/Last Authors	Publications Misc. Metrics
Graph for funding by year [at bottom]	Grant Budgets By Year →
REDCap surveys completed	Emails
Demographic data completed	Demographics

REDCap Figures: General

- Flight Tracker downloads all available fields from a data source
- Fields are displayed on individual REDCap forms
- These figures are good for unique questions
- Trick when on a REDCap Data Form:
 - Get field name by clicking faint H – short for “History”
 - Turn into a REDCap Report – filter or data point

Activity Code

 R01

Data History for variable "nih_activity_code" for record "16"

Listed below is the history of all data entered for the variable "nih_activity_code" for Record Id "16". The data history results are sorted from earliest to most recent.

Date/Time of Change	User	Data Changes Made
12-12-2024 10:23:34 (most recent data change)	SYSTEM	R01

REDCap Figures: Grants

- Focus on **NIH RePORTER** instrument:

- Program Officers
- Agency IC Admin
- Congressional District
- FOA ID
- Award Notice Date
- RCDC Terms
[like MeSH terms]
- Abstract
- COVID-related?

Principal Investigators	 Julie Anne Bastarache; Lorraine B Wai
Contact PI Name	 WARE, LORRAINE B
Program Officers	 Lora A. Reineck
Agency IC Admin	 National Heart Lung and Blood Instit.
Agency IC Fundings	 [{"fy":2018,"total_cost":501431}]
Congressional District	 TN-05

REDCap Figures: Publications

- Focus on **Citation** instrument:
 - Include? [Is the pub wrangled?]
 - Is Flagged? [Is the Pub Flagger used?]
 - Source [Name search v. ORCID]
 - Full PubMed Citation
 - Timestamp [Date of publication]
 - PMCID [if registered]
 - Components of citation [Authors, title, journal, pages, etc.]
 - DOI [add <https://doi.org/> to beginning]

Full PubMed Citation	<div>Brittain EL, Janz DR, Austin ED, Bastarache JA, Wheeler LA, Ware LB, Hemnes AR. Elevation of plasma cell-free hemoglobin in pulmonary arterial hypertension. Chest. 2014 December; 146(6):1478-1485. doi:10.1378/chest.14-0809.</div> <div>Expand</div>
Timestamp (Calculated)	<div>2014-12-01</div> <div>Y-M-D</div>
PubMed Central ID (PMCID)	<div>PMC4251612</div>
DOI	<div>10.1378/chest.14-0809</div>
Authors	<div>Brittain EL, Janz DR, Austin ED, Bastarache JA, V</div>
Title	<div>Elevation of plasma cell-free hemoglobin in pul</div>

REDCap Figures: Publications

- Focus on **Citation** instrument:
 - Publication Types
 - MeSH Terms
 - Associated Grants
 - PubMed Keywords
 - Abstract

Associated Grants	<div><div></div><div>R21 HL117676; K24 HL103836; T32 HL087738; K23 HL0987431; 1 UL1 RR024975; K08 HL093363; UL1 RR024975; P01 HL108800</div></div> <div>Expand</div>
Abstract	<div><div></div><div>Cell-free hemoglobin (CFH) is a potent nitric oxide scavenger associated with poor outcomes in several diseases. Pulmonary arterial hypertension (PAH) is characterized by reduced nitric oxide availability. We hypothesized that CFH would be elevated in</div></div> <div>Expand</div>

REDCap Figures: Publications

- **iCite** info from **Citation** instrument:
 - Is Research? [Original Research v. Not Original Research – iCite automatic designation]
 - Times Cited by Others
 - Relative Citation Ratio [RCR]
 - Clinical PMIDs Citing This Paper
 - PMIDs Citing This Paper
 - PMIDs This Paper Cites
 - iCite Last Update

iCite terms	
Is Research? (from iCite)	<input checked="" type="radio"/> Yes <input type="radio"/> No reset
Override iCite's designation	<input type="radio"/> Original Research <input type="radio"/> Not Original Research reset
Number of Citations by Other Papers (from iCite)	<input type="text" value="39"/>
Number of Citations per Year (from iCite)	<input type="text" value="3.5454545454545"/>
Expected Number of Citations per Year (from iCite)	<input type="text" value="2.4164513336454"/>
Field Citation Rate (from iCite)	<input type="text" value="5.584070567051"/>
NIH Percentile (from iCite; cf. stats reference)	<input type="text" value="64.3"/>
Relative Citation Ratio (RCR; from iCite ; normalized to field with mean of 1)	<input type="text" value="1.47"/>
Clinical PMIDs Citing This Paper (from iCite)	<input type="text" value="31573976, 28400191"/>

Expand

How to Correct

- Beyond the scope of this presentation
- Generally:
 - Grants: Grant Wrangler & Custom Grants
 - Publications: Publication Wrangler

Your Feedback

- By Julie Elworth's request, I'm going to turn this topic into a video & transcript for online help.
- **I need you to tell me how I can improve it:**
 - What did this presentation do right?
 - What should be included but wasn't?
 - What can be explained better?

Recap

- Summary form in REDCap
- Scholar Profile
- Dashboards
- Grants & Pubs in REDCap
- Corrections

What's Next?

Find a Collaborator

- Earlier in 2024, the Scholar Portal added a way to search all Flight Trackers for a certain publication topic [MeSH term]
- We've been using it to focus emails for career opportunities, like a research grant for "Health Services Research"
 - Avoiding excess email noise
- We love the targeting; we want to improve it:
 - Make a more advanced interface
 - Make a table of outputs
 - Add it to the admin side of Flight Tracker, too
- **In internal reviews**

Mentee-Mentor Agreements

- **Nearing completion**
- Admins can turn off certain sections
- Admins can add custom questions for all mentees
- Individual mentors can add custom questions for their mentees

“Leaky Pipeline” Detection Survey

- What factors could cause a “leaky pipeline” in a program?
- The literature has explored a lot of fixed, personal traits like race & gender. **What dynamics can be more directly changed?**
- *E.g.*, mentor-mentee ratio, size of program, administrative support, etc.
- Idea: Send out a survey to study contributing factors that might be more easily changed
